# DJMike

For almost a decade I've been living in the rhythm of events that I heat up, mixing and playing my favorite music. Countless thousands of kilometers en route from event to event: for corporate, event agencies or individual clients. That's how I met my industry, the needs of different audience and bands such as **Perfect**, **Czesław Śpiewa** or **Afromental**, with whom I shared the stage. Combining profession and passion, I do not get out of breath and develop myself. For 4 years I have been carrying out my original musical project **2Faces**. It is fresh and energizing synthesis of DJ sets and real drums. **2Faces** perfectly filled the niche in music market gaining appreciation of event organizers in the whole country.

## Video with Music Mixing

When it comes to the impression, triggers count - that is why I add video to the music I play, both mixed live!

Remixes and original songs from the best party genres: R&B, POP, ROCK, 80's, 90's simultaneously combined with image, create unique audio-visual show, which engages double.

Video with Music Mixing is music that you not only hear ...

## How is it made

I prefer evening Espresso to morning coffee. I arrange my equipment in the booth, then I test software, sound and image. I'm ready after fifteen minutes. When I gather the guests and give heterogeneous, unique character to the prior empty place their pupils dilate. Order is no longer an order, work in no longer work. There is only one agreement – between me and the audience – fun, atmosphere and millions of calories burned on the dance floor.

---

DVJ - (abb. Disc Video Jockey) - a person who selects, plays and mixes live music and video in order to amuse audience / make the audience dance. DVJ tries to create smooth artistic performance, combining different pieces of music that match to visual material.
